

Safia Lounassi

Computer Science Engineering Student | Full-Stack Developer

Adrar, Algeria | louanssisafia6@gmail.com | github.com/cssafia | linkedin.com/in/lounassi-safia-594641259 | Portfolio

Profile

Motivated Computer Science Engineering student with hands-on Full-Stack development experience building web and mobile applications. Proficient in REST APIs, authentication, database design, document management, and enterprise IT environments. Combines strong software engineering skills with a growing expertise in cybersecurity.

Education

Higher School of Computer Science (ESI SBA) 2023–2028 *Computer Science Engineering – Cybersecurity Specialization* Sidi Bel Abb'ès, Algeria

Completed three years of intensive Computer Science engineering building a strong foundation in software development, data structures and algorithms, object-oriented programming, software architecture, databases, operating systems, computer networks, and web development. Currently in the fourth year, specializing in Cybersecurity.

Experience

Full-Stack Developer Intern June 2025 – July 2025 *SolRus – Zakat Aid Project* Internship

- Developed a full-stack platform that digitized and streamlined the entire financial-aid application lifecycle—from submission, document collection, and review, to commission decisions, fund allocation, and follow-up.
- Implemented role-based access control and workflow management for applicants, volunteers, commissions, and administrators, ensuring secure and efficient handling of applications and user data.
- Built comprehensive document management, automated PDF/CSV reporting, audit logging, renewal workflows, and real-time notifications using React, Node.js, Express, and PostgreSQL.

IT and Networking Intern Sep 2025 *Algeria Telecom – Adrar* Adrar, Algeria

- Assisted in monitoring and troubleshooting enterprise network operations, gaining hands-on exposure to telecommunications infrastructure and IT service workflows.
- Collaborated with senior engineers to diagnose and resolve connectivity issues, contributing to improved service reliability for internal business systems.

Selected Projects

ZeroWaste University Project *Mobile and Web Platform – Flutter, Next.js, Express, MySQL* GitHub

- Designed and built a food redistribution platform that connects donors, organizations, and beneficiaries, featuring donation tracking, reservation management, real-time notifications, and location-based matching.

Algeria Post Hackathon *Citizen Engagement Platform – React, Laravel, MySQL* GitHub | Demo

- Developed a citizen engagement web application with complaints, suggestions, news, ATM availability, and an AI-powered chatbot. **3rd Place – Community Engagement Track.**

EventSphere University Project *Event Management Platform – React, Laravel, MySQL* GitHub | Demo

- Created a full-featured event management system enabling clubs and organizations to create, book, schedule, and manage events with participant registration and attendance tracking.

Technical Skills

Languages	JavaScript, Python, C, C++, PHP, Dart
Frontend	React, Next.js, HTML5, CSS3
Backend	Node.js, Express.js, Laravel, REST APIs, JWT Authentication
Mobile	Flutter
Databases	PostgreSQL, MySQL, MongoDB
Tools	Git, GitHub, Docker, Swagger/OpenAPI, Cloudinary

Languages

Arabic (Native) | French (Professional) | English (Professional)
